PROFILE SUMMARY

Computational science graduate with hands-on experience in SQL, Excel, and Python for data analysis. Completed three end-to-end projects involving London Bike Rides Analysis, Covid-19 impact analysis and Global Climate Change Analysis. Looking to apply data driven thinking to help business make faster and smarter decisions and build long term relationships with clients.

PROJECTS

London Bike Rides:

- Prepared a full fledged deep analysis of 2.58M+ bike rides in London using python and Tableau
- Used pandas and NumPy for data cleaning and manipulation and then file was exported.
- Built an interactive dashboard using Tableau showcasing KPI, Heatmap, Moving average and interactive filters.
- Delivered insights like bikes availability should be increased during spring and summer as bike ride peaks in these seasons
- Rebalance stations before morning commuting hours (around 6-9AM).

COVID-19 Impact Analysis:

- Analyzed COVID-19 data from Our 'World in Data' using SQL and Microsoft Power BI.
- Built interactive dashboards to that highest infection rate was in Latvia, and Europe (~32%).
- Observed that increased vaccination (2022-2023) resulted in declining mortality rate.

Global climate change Analysis:

- Analyzed 62 years of global climate data using Python with Pandas, Matplotlib, and Seaborn and performed global, regional, and country-level analysis
- Identified key insights including ~1.16°C rise in average temperature (1961-2022), peak warming in recent decade, and Europe & Central Asia as major contributors.
- Highlighted strong impact of high-income countries on emissions and warming trends, supporting

Certificates

- Machine Learning specialization by Andrew nag, Stanford, DeepLearning.AI
- Intro to SQL: Querying and managing data, Khan academy

TECHNICAL SKILLS

- SQL
- Python
- APIs,
- NumPy, Pandas, Matplotlib
- Power BI
- Excel

INTERPERSONAL SKILLS

- Teamwork
- Get work done
- Quick learner
- Can work Independently

LANGUAGES

English:

Professional Proficiency

Urdu:

Professional Proficiency

EDUCATION

MPhil: Computational Chemistry
3.92/4
